The Human Standard

A PRACTICAL WORKBOOK

Map your business for AI.

People. Knowledge. Platforms.
A clearer plan for the work ahead.

MAP YOUR PLATFORMS / EXPLORE CONNECTIONS / PLAN YOUR MARKETING

BUSINESS / TEAM

START DATE

START HERE

Useful work starts with a clearer picture.

Use this workbook to connect business goals, approved knowledge and the tools you already have. Then choose one workflow to test.

01 Map what you have

Pages 3-5. List the platforms you control, the accounts you use and the information your team trusts.

02 Explore what could connect

Pages 6-8. Consider external environments, shortlist one useful connection and sketch a workflow with a human review point.

03 Plan a real piece of work

Pages 9-20. Choose a template, write the brief, assign an owner and decide what success will look like.

HOW TO USE THE WORKSHEETS

Type into the fields in a PDF reader, or print at A4 / actual size and write by hand. Save a fresh copy for each project. Keep entries concise; put detailed files in your own approved workspace.

One task is enough to start. You do not need to connect every tool or automate every step. An approved export and a well-written brief can be a useful first version.

The difference is human. AI can prepare groundwork; people check accuracy, relevance and suitability. Never record passwords, API keys or confidential customer details in this workbook.

01 / MAP YOUR PLATFORMS

What do you already use?

Record owned assets and the third-party accounts your business manages. Control of an account is different from ownership of the platform.

BUSINESS / TEAM

COMPLETED BY / DATE

Platform / address	Purpose + audience	Account owner / access	Keep, improve or retire?

Think: website/CMS, domain and DNS, email, CRM, email marketing, social accounts, analytics, ecommerce, shared files, bookings, project tools and AI subscriptions. Record access roles, never login credentials.

01 / MAP YOUR ECOSYSTEM

See the whole working environment.

Write your actual platform names into the boxes. Add arrows when printed, or describe the flow below. Mark each handoff as manual, connected or unknown.

YOUR APPROVED BUSINESS KNOWLEDGE

Brand voice / facts / offers / examples

WEBSITE / SHOP / BOOKINGS

EMAIL / CRM / CUSTOMER RECORDS

SOCIAL / PUBLISHING ACCOUNTS

DESIGN / VIDEO / ASSET LIBRARY

ANALYTICS / REPORTING / RESEARCH

AI / PROJECT / WORKFLOW TOOLS

ONE IMPORTANT FLOW: SOURCE > DRAFT > REVIEW > DESTINATION

Example: product folder > weekly social draft > owner review > approved scheduler. Distinguish a shared file or manual copy from a working integration. Use page 7 to shortlist connections worth investigating.

01 / MAP YOUR KNOWLEDGE

Where does the truth live?

Identify the information your team should rely on. A clear source of truth reduces inconsistent or outdated drafts.

Knowledge or asset	Approved location / link	Owner + review date	Who may use it?

MOST IMPORTANT GAP TO FIX

PERSON RESPONSIBLE / BY WHEN

Include brand voice, product facts, approved claims, prices, service scope, image rights, FAQs, case studies and customer permissions. Use descriptions or links rather than copying sensitive records here.

02 / EXPLORE CONNECTIONS

Look beyond the tools you use today.

These are environments to investigate, not a shopping list. Start with the outcome, then check the current connection options and account requirements.

KNOWLEDGE & COLLABORATION

Microsoft 365 / SharePoint; Google Workspace / Drive; Notion.

Where are approved files kept? Could staff find answers or prepare briefs from a permission-controlled source?

CUSTOMERS & COMMERCIAL

A CRM such as HubSpot; email tools such as Mailchimp; Shopify or a booking system.

Could an approved enquiry become a follow-up task? Which customer details are actually needed?

CONTENT & CREATIVE

Canva; social publishing environments; video production tools.

Could an approved brief feed a design or production workflow? Who checks the finished asset and usage rights?

PERFORMANCE & DISCOVERY

Google Analytics 4; Search Console; advertising reports; public research sources.

Could reporting combine activity with enquiries? What data access, date range and attribution limits apply?

WORKFLOW CONNECTIONS

Native integrations; Power Automate; Zapier; APIs or webhooks.

Is there a supported trigger and action for this exact task? Can an export and manual handoff do the job first?

A connection may search or read information, create a draft, or take an action. These are different permissions. Availability, licences, costs and supported actions vary. See official starting points on page 22.

02 / CHOOSE DELIBERATELY

Which connection would earn its place?

Choose up to three opportunities. Describe the job before naming the tool. Confirm support with the platform owner or your implementation partner.

Work we want to improve	Source > destination	Connection route to check	Value / owner / decision

FIRST CHOICE + WHY IT MATTERS

CHECK BEFORE CONNECTING

Confirm the exact trigger and action, plan/licence, setup and running costs, permissions, data handling, failure alerts and who can disconnect it. Start with read-only access where it fits the job.

02 / DESIGN ONE WORKFLOW

From information to an approved outcome.

Map a single repeatable task. Separate draft preparation from publishing, sending or changing business records.

WORKFLOW NAME + THE BUSINESS OUTCOME

TRIGGER / HOW OFTEN?

APPROVED SOURCE / OWNER

WHAT THE AGENT OR SKILL PREPARES

WHERE THE DRAFT IS SAVED

HUMAN REVIEWER / WHAT THEY CHECK

WHO APPROVES THE FINAL ACTION?

WHAT HAPPENS IF IT FAILS?

HOW WILL WE TEST / MEASURE IT?

TRY A SMALL, REVERSIBLE TEST

Use an agreed sample. Check the result, source access and failure path before expanding. Keep publishing, spending and customer contact behind the approvals you have agreed.

03 / PLANNING TEMPLATE 01

Set a goal you can work towards.

Move from a broad ambition to a specific audience, measurable result and practical next action.

PROJECT / CAMPAIGN

OWNER / PLANNING PERIOD

BUSINESS NEED - WHAT NEEDS TO CHANGE?

WHO NEEDS TO THINK, FEEL OR DO WHAT?

BASELINE - WHAT HAPPENS TODAY?

TARGET + METRIC + DATA SOURCE

DEADLINE / REVIEW DATE

FIRST THREE ACTIONS + WHO WILL DO THEM

MAKE THE GOAL TESTABLE

Example: increase qualified farm-visit enquiries from 8 to 12 per month over the next three months, measured through the enquiry form and a simple qualification log. Example figures only.

03 / PLANNING TEMPLATE 02

Keep your brand in the brief.

Complete this once, then update it when your positioning, audience or offer changes. Use it alongside approved brand guidelines.

BUSINESS / OFFER

PRIMARY AUDIENCE / THEIR NEED

OUR PROMISE - THE VALUE WE WANT TO BE KNOWN FOR

WHY BELIEVE US? / EVIDENCE

WHAT MAKES THIS DIFFERENT?

THREE VOICE TRAITS + A SHORT EXAMPLE

WORDS / CLAIMS / TONES TO AVOID

KEY MESSAGE + ONE CLEAR CALL TO ACTION

APPROVED SOURCES / BRAND ASSETS

FACT CHECKER / FINAL APPROVER

03 / PLANNING TEMPLATE 03

Plan one connected campaign.

Tie the offer, message, channels and actions to the same goal. Start with the goal worksheet if the outcome is unclear.

CAMPAIGN / DATES

OWNER / APPROVED BUDGET

GOAL + TARGET METRIC

AUDIENCE + INSIGHT / BARRIER

THE OFFER + CENTRAL MESSAGE + DESIRED ACTION

Channel / role	Asset or activity	Owner / deadline	Measure + source

APPROVALS / DEPENDENCIES / BUDGET CHECK BEFORE LAUNCH

03 / PLANNING TEMPLATE 04

Your weekly social content planner.

Give each post a purpose. Repeat this sheet each week; adapt the channels and cadence to your audience and available resources.

WEEK COMMENCING / CAMPAIGN

GOAL / AUDIENCE / MAIN CTA

Date / channel	Purpose + key message	Format / asset / link	Owner / approval / status

BATCH-PRODUCTION TASKS / DUE DATE

WEEK-END REVIEW / WHAT TO LEARN

03 / PLANNING TEMPLATE 05

Brief a post before you draft it.

Use one sheet for a social post, carousel, short article or email content item. Keep the objective and next action clear.

CHANNEL / FORMAT / DATE

CONTENT OWNER / APPROVER

AUDIENCE + THE QUESTION WE ANSWER

PURPOSE + DESIRED ACTION

HOOK / CORE MESSAGE / SUPPORTING POINTS

APPROVED FACTS / SOURCE LINKS

PHOTO / VIDEO / DESIGN + RIGHTS

DRAFT CAPTION OR COPY OUTLINE + CALL TO ACTION

ACCESSIBILITY / CAPTIONS / ALT TEXT

APPROVAL DATE / STATUS / LIVE LINK

03 / PLANNING TEMPLATE 06

Find a story worth sharing.

Build a PR brief around a verified development and the people it matters to. A draft release is a starting point for editorial judgement.

ANNOUNCEMENT / TIMING / EMBARGO

COMMUNICATION GOAL / AUDIENCE

WHAT IS NEW, TIMELY OR USEFUL - AND WHY NOW?

WHO / WHAT / WHEN / WHERE / WHY / HOW - VERIFIED FACTS

SPOKESPERSON / APPROVED QUOTE

PROOF / SOURCES / PERMISSIONS

MEDIA ANGLE / OUTLETS TO RESEARCH

SUPPORTING ASSETS / INTERVIEW ACCESS

FACT CHECK / QUOTE APPROVAL / FINAL SIGN-OFF / RELEASE DATE

03 / PLANNING TEMPLATE 07

Make outreach relevant. Keep track of the response.

Research current contacts and outlet fit. Record public work contact details or a link to your approved contact system; avoid private personal information.

STORY / OUTREACH OWNER

SUCCESS LOOKS LIKE / REVIEW DATE

Outlet / contact source	Why this story fits	Pitch angle / material	Owner / date / response

FOLLOW-UP PLAN / INTERVIEW PREPARATION / NEXT ACTION

Confirm facts, quotes, image rights and spokesperson availability before pitching. Tailor each approach, respect contact preferences and record the outcome. Coverage is an editorial decision, not a guaranteed result.

03 / PLANNING TEMPLATE 08

Turn website activity into useful next steps.

Use the same date range and definitions each time. Distinguish observed results from explanations that still need testing.

REPORTING PERIOD / COMPARISON

DATA SOURCES / REPORT OWNER

Metric + definition	Previous / current / target	Observation / data limit

TOP CONTENT / ENQUIRY PATH TO REVIEW

WHAT WE THINK IS HAPPENING + EVIDENCE

ONE IMPROVEMENT TO TEST / OWNER / DUE DATE / SUCCESS MEASURE

03 / PLANNING TEMPLATE 09

Give your video a job to do.

Plan the idea before production. Confirm the audience, format, assets and approvals, then develop the storyboard.

GOAL / AUDIENCE / MAIN MESSAGE

DURATION / CHANNEL / ASPECT RATIO

CALL TO ACTION / DESTINATION

BUDGET / OWNER / DELIVERY DATE

Time / scene	What we see	What we hear / on-screen text

PEOPLE / PRODUCT / LOCATION / ASSETS

VOICE / MUSIC / RIGHTS / CAPTIONS

Agree character and product consistency, usage permissions and the final approver. An animatic or storyboard is a useful approval checkpoint before spending on final production.

03 / PLANNING TEMPLATE 10

Plan a useful email or follow-up.

Prepare communication around a real customer need. Use an approved audience and your business rules for permission, contact preferences and sending.

AUDIENCE / SEGMENT / SOURCE

PURPOSE / TRIGGER / SEND DATE

WHAT DOES THE READER NEED TO KNOW - AND WHY NOW?

SUBJECT LINE / OPENING IDEA

OFFER / EVIDENCE / APPROVED FACTS

MESSAGE OUTLINE + ONE CLEAR CALL TO ACTION

LINKS / LANDING PAGE / PERSONALISATION

OWNER / APPROVAL / SEND CONTROLS

METRIC + SOURCE / REVIEW DATE

FOLLOW-UP RULE / WHO HANDLES REPLIES

03 / PLANNING TEMPLATE 11

Make the next 30 days manageable.

Turn the brief into a short delivery plan. Include approvals and dependencies as real work, with time allocated to them.

PRIORITY / OUTCOME

PLAN OWNER / START / REVIEW DATE

Action / deliverable	Owner	Due / dependency	Done when / status

DECISION OR HELP NEEDED

FIRST ACTION IN THE NEXT 48 HOURS

03 / PLANNING TEMPLATE 12

Review the work. Improve the next version.

Use this before release and again after results are available. Keep the evidence and the final decision with the approved project files.

PROJECT / VERSION / REVIEWER

REVIEW DATE / RELEASE DECISION

QUALITY CHECK - FACTS, BRAND VOICE, CLAIMS, LINKS, RIGHTS, ACCESSIBILITY

CHANGES REQUIRED / OWNER / DEADLINE

APPROVED BY / APPROVAL DATE

RESULT VS GOAL + DATA SOURCE

WHAT WORKED / WHAT DID NOT?

WHAT WILL WE CHANGE IN THE BRIEF, SOURCES OR WORKFLOW?

NEXT TEST / OWNER / DUE DATE

NEXT REVIEW / KEEP, CHANGE OR STOP?

04 / PUT IT TOGETHER

One business.
One useful first workflow.

Fictional example: a small food producer wants a steadier flow of enquiries about farm visits. The aim is a useful plan, not more tools for their own sake.

THE GOAL

Increase qualified visit enquiries from 8 to 12 a month over the next three months. Track form enquiries and log whether each enquiry matches the offer.

THE KNOWLEDGE

Approved opening dates, visit information, product facts, brand voice and licensed photos are kept in one shared folder. The owner confirms changes weekly.

THE PLATFORMS

The business controls its website, enquiry form, Facebook and Instagram accounts, and a shared planning document. Analytics exports are available.

THE FIRST WORKFLOW

On Monday, the owner supplies this week's priorities. A skill prepares five draft content ideas and a photo list in the planning document. The owner checks facts and approves posts before scheduling.

THE CONNECTION TO EXPLORE

Check whether the chosen scheduling tool can accept approved drafts from the planning environment. Until verified, use a manual handoff. Do not grant publishing access simply to test draft quality.

YOUR NEXT STEP

Complete pages 3-5, choose one opportunity on page 7 and sketch it on page 8. Use the relevant planning templates to test whether the work is clearer, more consistent and easier to review.

Want help choosing the first task? Start a scoping conversation with The Human Standard at humanstandard.au/support/.

05 / INTEGRATION REFERENCE

Check the connection before you commit.

Official starting points to help your team investigate options. These links are reference routes, not an endorsement or a promise that your accounts can connect.

Microsoft 365 Copilot connectors

Explore external knowledge sources and permission-aware access. Check licences and administrator requirements.

learn.microsoft.com/en-au/microsoft-365/copilot/connectors/overview

Zapier app directory

Look up the two specific apps, then confirm the trigger and action you need. An app listing alone does not prove the full workflow is supported.

zapier.com/apps

Google Analytics Data API

Investigate authorised access to Analytics report data. Start with a standard export if that is sufficient.

developers.google.com/analytics/devguides/reporting/data/v1

Google Search Console API

Investigate search performance and verified-site data access. Keep reporting definitions and access requirements clear.

developers.google.com/webmaster-tools

Canva Apps / Mailchimp Canva Sync

One example of a creative-to-email environment to investigate. Confirm the current app behaviour and plan requirements.

www.canva.com/apps/tc_mailchimp/mailchimp-canva-sync

FOUR ROUTES TO CONSIDER

Native integration: a built-in connection. Connector platform: links supported triggers and actions. API/webhook: a technical route that needs setup. Export/import: a practical manual handoff. Choose the simplest route that meets the job.

Features, costs and access requirements can change. This workbook supports planning; implementation and approvals are agreed separately.
